About the Furuichi Tumulus Cluster

More than 120 kofun, ancient tumuli, were constructed from the late 4th century to the mid 6th century. There are 45 remaining kofun. Seven of them are huge and their mound lengths exceed 200m.

Ojin-tenno-ryo Kofun

This is the second largest kofun in Japan with its mound length of 425m. This kofun uses the largest volume of soil in Japan. It seems to have been constructed in the early 5th century.
